Top 20 Agile Testing Interview Questions

1) As a tester what should be your approach when requirements change continuously?

When requirement keeps changing, continuously agile tester should take following approach

- Write generic test plans and test cases, which focuses on the intent of the requirement rather than its exact details
- To understand the scope of change, work closely with the product owners or business analyst
- Make sure team understand the risks involved in changing requirements especially at the end of the sprint
- Until the feature is stable, and the requirements are finalized, it is best to wait if you are going to automate the feature
- Changes can be kept to a minimum by negotiating or implement the changes in the next sprint

2) List out the pros and cons of exploratory testing (used in Agile) and scripted testing?

	Pros	Cons
Exploratory Testing
